RE: California Hospital Outcomes Report
Alhambra Hospital
#190017

Gentlemen:

Alhambra Hospital is submitting a response to the data published in the California Hospital Outcomes Report dated June 1, 1995.

We are limiting our response to outcome statistics for Acute Myocardial Infarction: Death.

We believe that additional risk factors not abstracted by our coders and the fact that in many cases advanced age and a Do Not Resuscitate (DNR) Order documented on the medical record (11 of the 25 cases of M.I. had DNR status documented) are mitigating factors which impact the results reported.

Attached is a listing of cases that have additional risk factors that were not coded/abstracted and are submitted as "comments" to be attached to the final report.

If you have any questions, do not hesitate to call.

Sincerely,

Tim McGlew
Acting Chief Executive Officer
Alhambra Hospital
